

Ordering repeat prescriptions during the **coronavirus** pandemic

As the NHS responds to the challenge of the coronavirus pandemic it is more important than ever that we think of others when we order our repeat prescriptions.

If everybody plays their part and only orders their medicines when needed then we can ensure there is sufficient supply of medicines for everyone that needs them.

You can make a difference by

- Only ordering your medicines if you have less than two weeks supply left at home.
- Checking what medicines you have at home before re-ordering more.
- Opening your prescription bag while you are still inside the pharmacy and returning any unwanted medicines to the pharmacist.

Remember

Don't order it if you don't need it.
